

PROXY VOTING POLICY REPORT

MERIAN GLOBAL INVESTORS

The tables below, accessed via the embedded links show voting according to the policy of Merian Global Investors. The tables are sorted by company name, date of the AGM and/or EGM, and are followed by a resolution number. The records date from 2015 because that is when we, as a company, began to give proxy voting instructions.

The tables show, for each resolution, how our voting policy (see link below) has been applied to the resolution. The table may also contain, particularly in some of the more controversial examples, or where we may have a reason to vote against a resolution, a brief summary as to why we voted in a particular way. For UK companies, we would also draw clients' attention to our statement on compliance, the UK stewardship code (see link below), which notes our practice and policy regarding engagement with companies in which we invest client monies, other than simply voting. Additional reporting on some of that contact with companies is contained in our stewardship reports see link below).

Past performance is not a guide to future performance and may not be repeated. Investment involves risk. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, an investor is not certain to make a profit on an investment and may lose money. Exchange rate changes may cause the value of overseas investments to rise or fall.
